WHEEL LOADER BUCKETS

Known for being the largest, sturdiest buckets in their class, CWS Buckets will stand-up to the most extreme and abrasive environments. These buckets are engineered to work in mining, quarry, and demolition environments while continuing to allow for the easy loading and dumping of material with minimal spillage you need to do your job. CWS Buckets designed with robust structure and wear part serviceability in mind to provide you with buckets built to last, and easy to maintain throughout their long life. These buckets are designed with productivity in mind, meant to maximize your machine's potential. With Several customization options, these buckets are built to take on the challenges of your specific jobsite.
