

PALADIN®

DUAL ARTICULATING CHUTE

3D FLOATING HITCH

ADJUSTABLE SKID SKIS

BACKDRAG BLADE

ICESHARK™ SNOW BLOWER

FOR SKID STEER LOADERS

The 250 Series IceShark Snow Blower maximizes productivity by offering a robust set of features to withstand aggressive use in a variety of conditions. The 250 Series IceShark Snow Blower was designed to offer the cleanest scrape, snow removal up to structures, and flexibility to place the snow where the user needs it.

ICESHARK™ SNOW BLOWER

FOR SKID STEER LOADERS

FEATURES

- The **Dual Articulating Chute** offering unprecedented user control on where to place the snow with the 270 degrees of motion and ability to blow snow from as close as 3 feet or up to 45 feet
- The new **3D Floating Hitch** offers side to side, up and down, and front to back motion to allow the snow blower to have the smoothest operating experience when working on uneven surfaces
- The 3D floating hitch also allows for an uninterrupted scrape offering a cleaner surface which means less salt is required
- The **Skid Skis** offer toolless adjustment which enable users to quickly and easily transition from gravel to pavement
- The new patented **Backdrag Blade** option allows operators to remove snow as close as 6" from a garage or wall to minimize the amount of shoveling required
- The built in yellow indicators guide users as they get close to a structure and give the operator guidance before engaging the backdrag functionality
