

Excavator Front Window Guards

Rugged. Versatile. Dependable.

CustomWorks can modify newly purchased or current equipment to deliver specific solutions for unique customer applications and challenges.

CustomWorks, a brand company of Paladin Attachments, delivers specialized solutions to enhance backhoes, bulldozers, dump trucks, excavators, skid steers and wheel loaders to outperform standard machines in the most rugged applications.

CustomWorks offers a broad range of products, services, engineering, manufacturing and installation expertise, including cab and machine guarding to protect machines and operators from rough outdoor elements and theft, key component protection to withstand dangerous jobsite conditions, and other equipment enhancements to ensure that machines meet performance requirements.
