SUPER LONG FRONTS

SUPER LONG FRONTS (SLF'S) FOR KOMATSU EXCAVATORS

Our stocking program for Super Long Fronts (SLF's) for Komatsu excavators is maintained at our Paladin CustomWorks facility located in Ooltewah, TN. These units are perfect for applications like Excavation and Material handling.

These SLF's come complete with stick cylinder (with flow control valve), bucket cylinder and linkage lugged to standard Komatsu arrangements. Also available as options are flow control for the boom hoist circuit and matching C&P cleanout or digging buckets. These products can be purchased as a kit for dealer install, or as a turnkey package installed at CustomWorks in Ooltewah, TN.

At present, one each of the following arrangements will be held in stock:

- Komatsu PC 240LC-10- 55' SLF (lugged PC 160)
- Komatsu PC 290LC-10- 60' SLF (lugged PC 160)
- Komatsu PC 390LC-10- 60' SLF (lugged PC 210)

In addition, the following "non stock" SLF's are available through Paladin CustomWorks on a build to order basis.

- PC 210LC-10-50' SLF (lugged PC 130)
- PC 240LC-10- 60' SLF (lugged PC 160)
- PC 490LC-10- 65' SLF (lugged PC 240)

* SLF attachments are designed for "Light Duty" work. Excavating work or heavy hoisting may result in side loads that may damage the machine.
