

HARDSCAPE GRAPPLE

FOR SKID-STEER LOADERS, COMPACT TOOL CARRIERS, COMPACT TRACTORS

Features

- Accommodates pavers/materials of different shapes and sizes automatically
- A single cylinder powers two grapple arms with rubber "gripping pads"
- Self adjusting grapple arms do not require an additional person for positioning

The **Bradco® Hardscape Grapple** by Paladin® eliminates the need to manually move hardscape materials such as concrete paver sections, concrete blocks, small boulders, and granite/limestone/concrete steps around the supply yard and job site.

HARDSCAPE GRAPPLE

FOR SKID-STEER LOADERS, COMPACT TOOL CARRIERS, COMPACT TRACTORS

 A cylinder check valve prevents loss of clamping force even if the machine's hydraulic power is lost

 Easily reach over the other sections on pallet to get to the one you need

Accommodates granite or concrete steps up to 48"

 Automatically adjusts the position of the clamping arms to ensure a good grasp of the material

 A simple stand utilizing two steel tubes has been integrated into the attachment that stores neatly into the quick attach assembly when not in use

SPECIFICATIONS	
Order Code	23548-0022
Weight	175 lbs
Cylinder	2.5" × 1.25" × 7.5"
Pad Size	5" x 7.75"
Grip Range	18-48"
Plunge Depth	13" (min)
Max Reach	14"
Lift Capacity	1,500 lbs
Clamp Force	1,525 lbs
