FEATURES & BENEFITS

Increases Excavator Productivity

JRB's range of excavator thumbs provides the versatility needed to get the most out of your excavator. Pick and move more material.

Built to Last

The thumb's rugged design combined with easily maintained parts provide a product that will provide years of productive service.

Easy to Install

With preassembled components and minimal welding, JRB thumbs can be put to work quickly and for less cost. Paladin also offers installation services through its CustomWorks facilities so excavators can arrive at your site ready to work.

PROGRESSIVE LINK

- Lightweight design provides peak machine stability and allows for more payload and lower fuel consumption
- Full rotation with bucket allows pickup of items throughout the bucket's range of motion

2T 3T 5T 8T 12T 15T 20T 25T 27T 35T 45T

MAIN PIN

- Minimal welding for quick install and less stress on critical boom structures
- Field replaceable components make it easy to replace common wear items onsite with minimal downtime

2T 3T 5T 8T 12T 15T 20T 25T 27T 35T 45T

WELD ON

- Low-profile thumb storage provides improved visibility
- Hydraulic action offers versatile thumb positioning
