

Features

- Available in 66" & 76" working widths
- Clean-up, rock removal and soil preparation rolled into one
- Follows ground contour while picking up rock & debris
- Tills and fluffs as it grooms the soil
- Eliminates need for extra machines and man hours

The **FFC® Preparator** by Paladin, is a more professional series of the FFC Auto Rake, having bidirectional capabilities. Operating this unit in reverse will perform the same tasks as the Auto Rake - site cleanup, soil preparation, and collecting material of 3/4 - 6 inches. A spinning brush located inside the unit removes fine material allowing it to fall into the collection bucket which has a perforated floor. This permits fine workable loam to remain on the job site and not be carried away as discarded debris. While operating this unit in a forward direction you can till and homogenize to 2 1/2 inches in depth, creating an excellent seedbed.

SPECIFICATIONS	66"	76"
Order Codes	LAF3566	LAF3576
Weight approx. (lbs)	1,455 lbs	1,565 lbs
Working Width	66"	76"
Overall Width	74"	84"
Teeth (inside)	300	340
Teeth (outside)	10	10
GPM Range	2,000-3,500	2,000-3,500
Capacity Struck	.38 yd ³	.46 yd ³
Lift Capacity	<9,000 lbs	<9,000 lbs
Operating Weight	<11,000	<11,000

Additional Features

- Rotating bi-directional drum carries rock and debris into bucket
- Bi-directional drum tills up to 2.5" deep
- Picks up rocks 1" to 20" in diameter
- Perforated bucket floor sifts dirt through
- Bucket dumps quickly and easily
- Provides excellent visibility of the work
- Attaches quickly to skid-steers
- Available CE certified
- 1 year warranty on structure; 6 month warranty on hydraulics
