# WHY SHOULD YOU BUY A JRB® LOADER BUCKET?

## Exceptional Performance

- JRB® buckets allow for max fill capacities and material retention, so that you can get the most out of your bucket and the loader.

## Designed for Your Loader

- Buckets have been optimized to fit your specific loader model to optimize productivity and to use common wear parts.

## Buckets for Every Need

- JRB's loader bucket offering covers a wide range of applications. These buckets have been designed to...

# GENERAL PURPOSE

The **JRB General Purpose (GP)** bucket is an ideal attachment to handle a variety of materials and loading tasks on the job site.

**OPTIMIZED FIT**

Designed specifically for the designated loader's attachments for a firm fit

**SLOPED BOTTOM**

Allows for max fill and improves dump angle by 5°

AVAILABLE IN THE FOLLOWING LOADER SIZES

100 200 300 500 600 700 800 900

# GENERAL PURPOSE CURVED

The **JRB General Purpose Curved (GPC)** bucket builds upon the GP bucket with curved sides and other features to keep spillage to a minimum for a more productive job site.

**IMPROVED MATERIAL RETENTION**

Curved sides and spill guard offers improved material retention

**OPTIMIZED FIT**

Designed specifically for the designated loader's attachments for a firm fit

**SLOPED BOTTOM**

Allows for max fill and improves dump angle by 5°

**Level Indicator** to help operator with bucket placement

**Spill Guard**

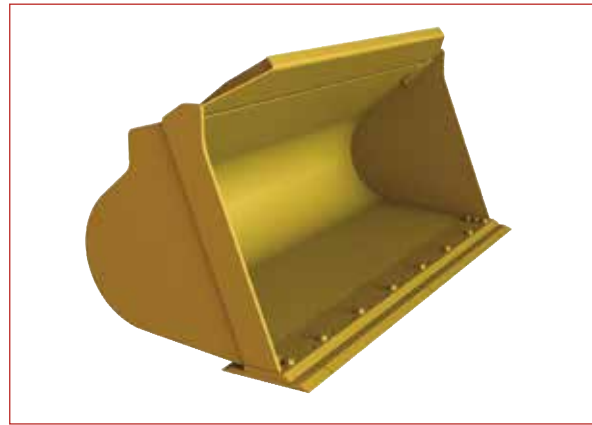

**Curved Side Cutters** to minimize spillage from heaped loads

AVAILABLE IN THE FOLLOWING LOADER SIZES

100 200 300 500 600 700 800 900

# LIGHT MATERIAL

The **JRB Light Material (LM)** bucket is perfect for picking up and transferring lighter weight materials such as mulch, coal, etc.

### OPTIMIZED FIT

Designed specifically for the designated loader's attachments for a firm fit

### LIGHT WEIGHT CONSTRUCTION

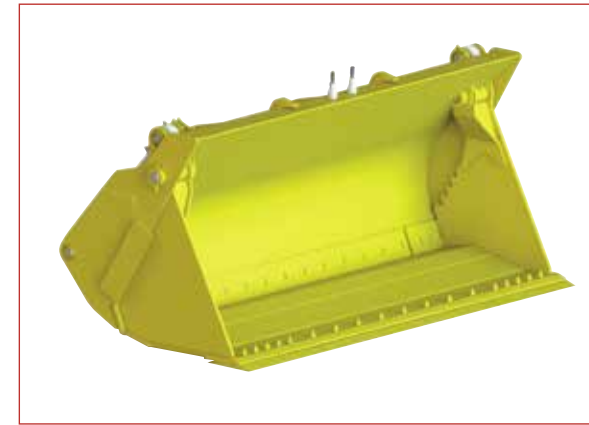

Bucket weight is optimized to provide great capacity

AVAILABLE IN THE FOLLOWING LOADER SIZES

100 200 300 500 600 700 800 900

# MULTI-PURPOSE

The **JRB Multi-Purpose (MP)** bucket provides a versatile loader tool that can handle excavating, grappling, loading and top dumping.

### DOUBLE FLOOR BOTTOM

Provides greater strength and durability

### OPTIMIZED FIT

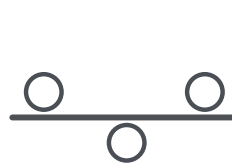

Designed specifically for the designated loader's attachments for a firm fit

AVAILABLE IN THE FOLLOWING LOADER SIZES

100 200 300 500 600 700 800 900

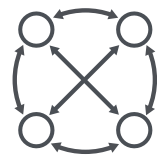

# HIGH LIFT, ROLLOUT

The **JRB High Lift, Rollout** buckets are ideal for use in feed truck loading, transfer stations, or anywhere increased dump height and accurate load placement is required.

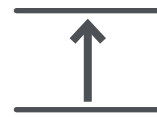

### INCREASED STABILITY

Dual cushioned cylinders on the outer bucket edge prevents twisting

### PLACEMENT FLEXIBILITY

93° dump angle provides maximum load placement flexibility

### INCREASED DUMP HEIGHT

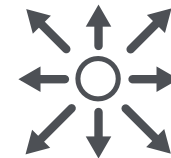

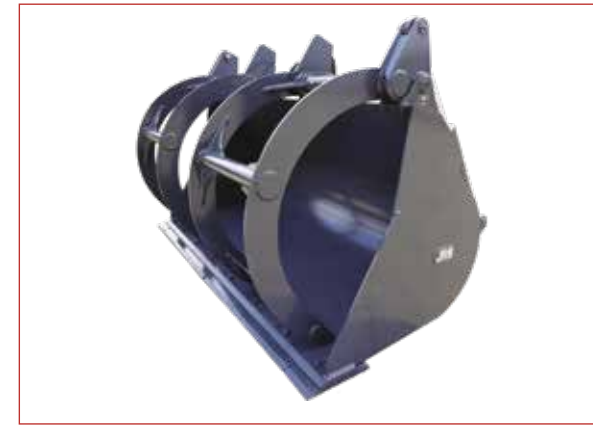

Load 13'6" tall trailers with ease, with up to 89% greater dump height

AVAILABLE IN THE FOLLOWING LOADER SIZES

# GRAPPLE

The **JRB Grapple** buckets are designed to work in land clearing and trash handling applications.

### INDEPENDENT OPERATION

Grapple arms move independently to clamp uneven loads

### OPTIMIZED FIT

Designed specifically for the designated loader's attachments for a firm fit

### CONFIGURABLE

Full, Half and Cutaway side profiles available to handle a variety of loads.

AVAILABLE IN THE FOLLOWING LOADER SIZES

# BUCKETS TO FIT YOUR UNIQUE NEEDS

## Side Dump

Ideal for operating in confined, hard to maneuver areas. The buckets allow material to be discharged to one side at a 45° angle.

## Refuse

Specifically designed to use in landfills and transfer stations. The bucket is available in Pushing and Loading styles.

## Rock

Ideal for operating in more severe loading and digging applications. A range of wear, tooth, and edge options are available to meet your specific needs.

# PALADIN OFFERS A FULL RANGE OF LOADER ATTACHMENTS

## Forks

Tackle through material handling jobs with JRB Forks

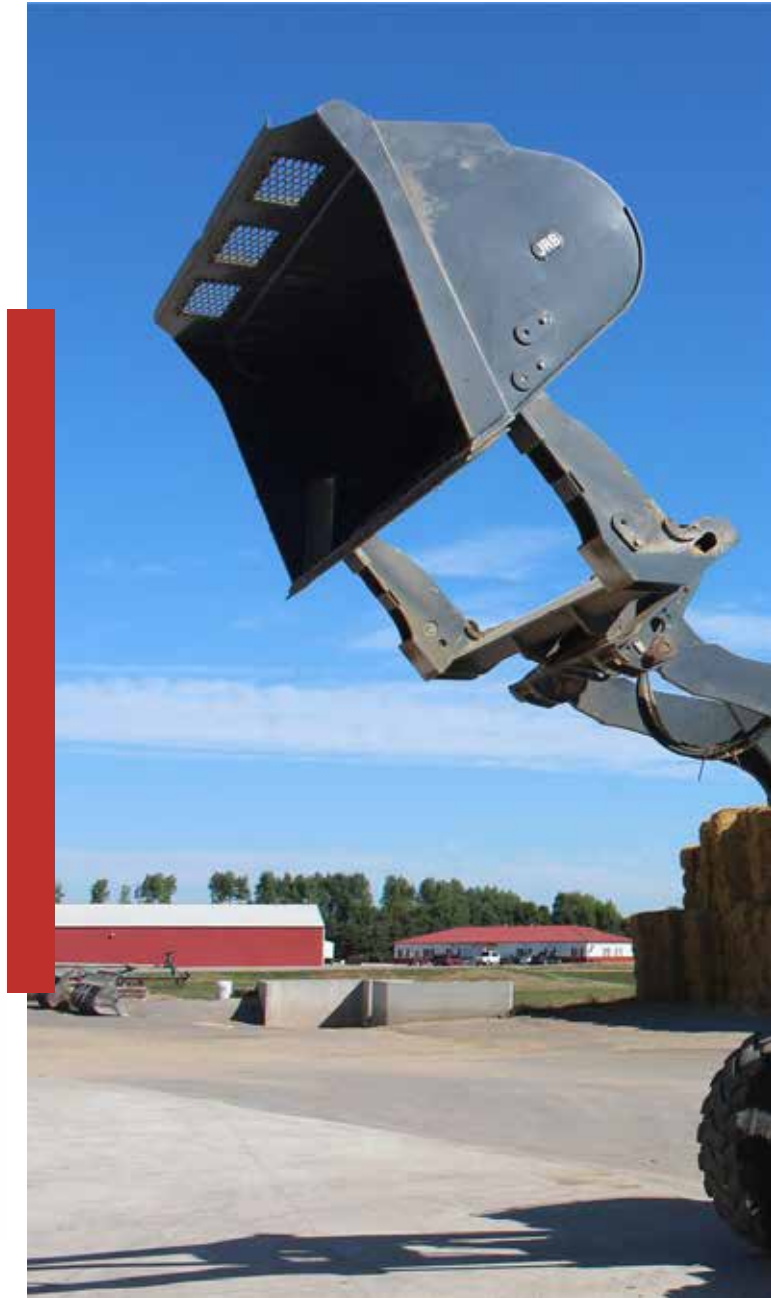

## Couplers

Increase the versatility of your loader with one of JRB's hydraulic couplers.

## Rakes

Clear debris and brush with JRB's loader rakes.

## and More...

Delivering specialized solutions to enhance your loaders, CustomWorks® can help standard machines tackle the most rugged applications. CustomWorks® can modify your newly purchased or current equipment at one of four convenient locations, or ship the necessary parts and kits directly to the dealership.
