M-SERIES POWER RAKES

FOR SKID STEER LOADERS

The Paladin® Rake features a 6-inch polypropylene barrier that can be adjusted to choose the desired size of material to be left on the seedbed. The barrier is rigid enough for pushing while also being flexible enough to allow damaging debris to pass through. The tool also has a proprietary tooth design made of pure carbide that is uniquely shaped to optimize the seedbed's sub-base fracture pattern, as well as to improve moisture retention and release.

M-SERIES POWER RAKES

FOR SKID STEER LOADERS

FEATURES

- Adjustable barrier above the roller allows you to quickly react to soil moisture conditions
- Bi-directional motor allows the drum to rotate in either direction maximizing flexibility
- Pure carbide proprietary teeth design - specially shaped to ensure the best possible seedbed sub-base fracture pattern and superior moisture retention and release
- The box-end plates are designed for quick and easy removal, allowing for windrowing and reverse box raking without the need for bolts. All you have to do is pull the pins to detach them
- Dual independently adjustable gauge wheels allow or skim passes for over-seeding - or - adjust to cut drainage grades
