

# Cast Multi Pick-Up Coupler For Wheel Loaders

Paladin once again leads the way with product design and engineering expertise to offer a truly unique cast wheel loader coupler system.

Nexus is defined as the central and most important point linking two or more things. This new and innovative coupler is just that, creating the ultimate system of productivity by joining your machine to a variety of attachment interchange styles.

The cast design has patented and patent pending features. It offers benefits such as improved offset, lighter weight, more visibility and optimized weight distribution for better center of gravity performance.

This new coupler is available for a variety of popular OEM machine models.
